### ACADEM IC PROJECTS

Project Name: Real Time Object Detection

.Python (OpenCV, NumPy)

.The aim of this project is to detect the object in real time with good accuracy

.The program takes real-time object input through the webcam .

.I have used YOLOv4 for this You can easily detect objects by capturing an image or live.

---

### ACADEMIC PROJECTS

Project Name: AUTOMATIC VIDEO  
SURVEILLANCE SYSTEM

.Currently the Surveillance systems can keep the video recording of homes, offices, banks, But that is useful only after incident happen. No Real time Update's are provided when there is a breach in real time.

.An AI featured security system which have real time monitoring and alert security system with no extra installation. When any human activity is detected, user will get updated immediately in real time with Mobile Notification along with a short video clip.

---

### TECHNICAL SKILLS

**Programming Languages :-** C ,Java, MySQL.
